

# INTRODUCING: *JANE LEE INTERIORS*

**Sussex-based Jane Lee is passionate about the power of home staging to get people moving. A certified home stager and interior designer, she specialises in creating dream properties for less. Her consultations – available in-person or online – can save clients thousands of pounds.**

"People often come to me because they're going round in circles trying to decide what to do. They're worried about overspending on somewhere they're leaving but at the same time recognise their home is missing that special something that will make it stand out," Jane explains.

"I can either visit, or study photos or a video, before reporting back. I explain where to prioritise, inside and out, to emphasise key selling points and maximise light and space. It can save a lot of wasted time, effort and money. Clients feel an enormous sense of relief once they have a clear plan to follow; sometimes months of confusion lifts."
